Delta Financial Systems Ltd
**The industry leading
SIPP and SSAS
technology provider**

About Delta

Delta is the leading supplier of SIPP and SSAS administration technology. The UK's leading insurers, banks, wealth managers, platforms and actuaries rely on our proven technology, exceptional service and understanding of the retirement market. Our clients choose us for our proven track record of delivering superior, cutting edge technology, supported by our expert knowledge and outstanding team.

Working for Delta

We know you are a professional who will play an integral role individually and collectively in developing the long term financial success of the company. We regularly monitor engagement and use this feedback to ensure we remain a great place to work. This means our employees are motivated to produce work of a demonstrably high standard and possess a passion for excellence we can best describe through our internal values as:

Benefits at Delta

Based predominantly in our central offices in Birmingham and occasionally in our Nuneaton office this permanent position (subject to a three month probationary period) offers 37.5 hours per week, Monday to Friday. Flexibility around office hours of 9.00 am – 5.00 pm is available on an ad hoc basis to provide employees flexibility for home/work balance.

In return you will need to be flexible to work occasional hours during peak upgrade times. This may include some planned evenings and weekends. In addition to a competitive salary, we strongly believe in offering an above market benefits package.

BUSINESS ANALYST

The Role

Delta is looking for a Business Analyst to deliver business requirements through the production of user stories for our development teams. The role will require you to:

- Understand the customer/user base and their product requirements
- Understand legislation-driven product requirements
- Define user stories and acceptance criteria
- Own user stories through the whole product life cycle
- Participate in backlog refinement sessions to guide the teams towards solutions that meet customer/legislative requirements
- Maintain product level backlogs
- Work within the SCRUM teams in a cross functional environment

Person Profile:

The role requires an individual who has great attention to detail and is able to effectively prioritise and manage their own workload.

The individual must be confident and able to take initiative in a delivery-focused environment and be independent, self-directing and able to collaborate with the SCRUM teams.

Core Skills Required:

- Excellent written communication skills with experience writing comprehensive, clear, well structured documentation
- Excellent verbal communication skills to a range of stakeholders
- Ability to define a problem and assist in solution identification
- Experience of agile methodologies and writing user stories

Secondary/Advantageous Skills:

- A background in pensions or lifetime savings administration
- SIPP/SSAS knowledge
